

SAMIS

One platform for the whole school.

A complete, bilingual school management system that brings admissions, attendance, academics, behaviour, wellbeing, finance, communication and reporting together in a single connected platform — with a built-in AI assistant that answers questions about your school in plain language.

Everything the school needs, in one place

1 Dashboard

Personalised overview, tasks, approvals and notifications the moment users sign in.

2 People

Student and staff records, registration, CSV import, transfers, SEN / EAL / G&T registers.

3 Daily Operations

AM/PM and period registers, bulk attendance, fire register and early-leave notes.

4 Behaviour & Pastoral

Rewards, sanctions, house points, detentions and a safeguarding register.

5 Timetable

Timetables by class or teacher, a live 'today' view and XML import.

6 Academic

Classes, subjects, curriculum, schemes of work, coverage matrix and objective bank.

7 Wellbeing

Nurse waiting list and visit logs, medications administered and counsellor notes.

8 Communication

Announcements, internal messaging, WhatsApp, email campaigns and surveys.

9 Calendar & Bookings

School and department calendars, room booking, parents' evening, trips and events.

10 Learning (LMS)

Assignments, resources, submissions and marking, and a class feed.

11 Finance

Fee structures, invoices, payments, discounts and scholarships, finance reports.

12 Operations

Transport routes, canteen, library, asset inventory and after-school clubs.

13 Insights & AI

At-risk flags, cohort analytics, predicted grades and three-year performance.

14 Reports

A custom report designer, Excel / PDF export and a saved-report library.

15 Parent Portal

A dedicated parent view of children, fees, calendar, consent forms and messages.

16 System

School profile, roles and permissions, academic years, branding and audit logs.

What makes SAMIS different

● Built-in AI assistant

A floating assistant answers everyday questions in plain language — how to perform a task, or a question about your own school data. Non-data questions are answered conversationally; data questions are routed automatically to a secure query engine, with a full admin log of every question, intent and result.

● Fully bilingual — English & Arabic

Every screen, label and report is available in both English and Arabic, with a clean right-to-left experience, so the whole community works comfortably in its own language.

● Attendance & safeguarding, done right

Fast AM/PM and period registers, bulk attendance, an instant fire-register PDF and a dedicated safeguarding register keep pupils safe and records defensible.

● Finance without the spreadsheets

Fee structures, invoices, payments and receipts, discounts and scholarships, and clear finance reports — the full billing cycle inside the same system as everything else.

● Insight that acts early

At-risk flags, cohort analytics, predicted grades and three-year performance trends help leadership act before small issues become big ones.

● A real parent portal

Parents sign in to a dedicated space for their own children — attendance, fees, calendar, consent forms, messages and documents — everything strictly limited to their family.

One system. Every part of school life, connected.

SAMIS replaces the patchwork of spreadsheets, separate portals and disconnected tools with a single, secure platform. Staff enter information once; students, teachers, leaders and parents each see exactly what they need.
