

How VMS Works

A smart, secure and fully branded way to invite, verify and welcome every visitor to your building.

THE PROBLEM

The lobby experience is broken.

Modern offices are busy, fast-paced and full of visitors — clients, contractors, delivery agents and guests. But the traditional lobby experience is broken.

Receptionists call hosts who don't answer. Visitors wait, get bored and yawn. The lobby fills up. It wastes time, frustrates guests and stresses out the team.

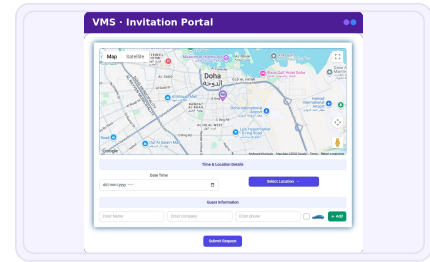

Five simple steps

From invitation to gate — under 60 seconds

01

Host sends the invitation

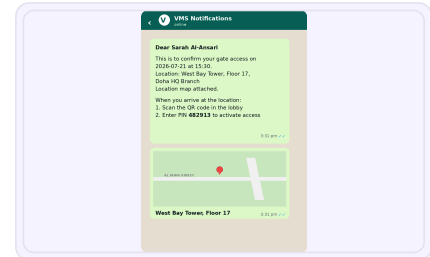

The host opens the VMS portal, picks the visitor, meeting date/time and location on the map, and reserves parking if needed. One click sends it out.

02

Visitor gets a WhatsApp message

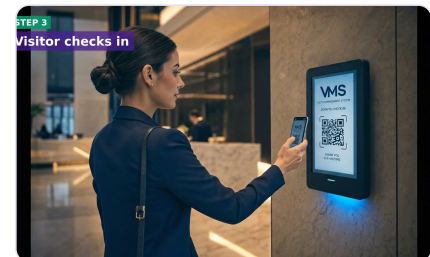

Instantly, the visitor receives a branded WhatsApp message with meeting time, location, a one-time PIN, and a map link that opens straight in Google Maps or Waze.

03

Self check-in at the lobby

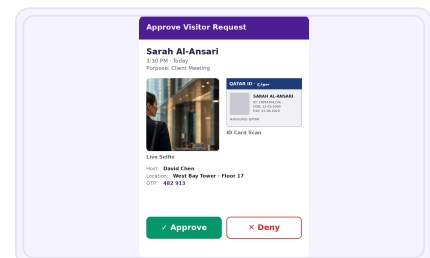

On arrival, the visitor scans the lobby QR code, enters their PIN, scans their ID card and takes a quick selfie. No queues, no paperwork.

04

Host approves in one tap

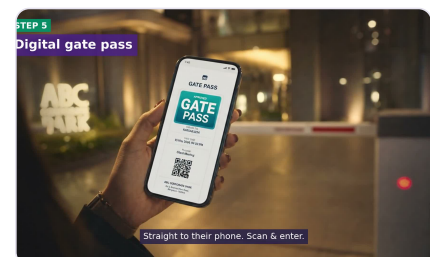

The host gets an alert on their phone with the visitor's live selfie, scanned ID and meeting details — and approves access with a single tap.

05

Digital gate pass

The visitor receives a fully branded digital gate pass straight on their phone — ready to scan at the security gate. No waiting, no calls, no lobby crowd.

**B****Total branding capability**

Configure your own look and feel — pick your logos, colors and backgrounds so every pass reflects your company.

CX**Great customer experience**

No waiting, no calls, no lobby crowd — visitors go from WhatsApp invite to gate pass in seconds.

S**Full security & audit trail**

ID scan, live selfie, host approval and OTP — every visit is verified, logged and traceable.

D**Powerful management dashboard**

See every guest, host, gate and pass in real time. Export reports, review history, spot patterns.

VIP**Frequent visitors skip the checks**

Recurring guests — contractors, partners, VIPs — get a fast-track pass and bypass repeat verification.

M**Smart & mobile-first**

WhatsApp invites, mobile QR check-in, one-tap approval on the host's phone — no app to install.

VMS • Smarter visits. Happier guests.

Great experience • Full security • Total branding • Powerful analytics
